Employment

Epic

Enterprise healthcare software company in Madison, WI | Technical Services | July 2015 - March 2017

- Developed, designed, and tested several logs, including bug fixes, customer requested enhancements, and internal utilities.
- Controlled long-term success of software consumers as primary point of contact for technical issues.
- Triaged issues and worked with end users, system administrators, and C-level executives and resolve problems across organizational levels.
- Understood client's organizational structure to advocate for their business needs internally.
- Handled critical escalations using troubleshooting skills to swiftly get to root causes.
- Communicated proactively about bugs, known issues, or upcoming changes to clients' existing workflows and found workarounds to minimize potential impacts.
- Optimized clients' use of software by guiding them to implement new features.
- Traveled onsite to support go-lives across functional areas, dealing with high-intensity situations such as trauma surgeons facing software malfunctions in the ER.
- Guided company's largest client through major implementation, which brought in unforeseen challenges in scalability, with acclaimed success.
- Mentored employees and trained customer analysts.

Agility Recovery

Business continuity and disaster recovery company in Charlotte, NC | Part-time Intern - Sales Support | November 2014 - April 2015

- Communicated with hundreds of clients via phone or email to organize and consolidate master resource for contact information.

Sundance Institute

Non-profit organization for independent film in Park City, UT | Summer Intern - Data Analyst | June 2014 - August 2014

- Owned implementation of Microsoft Dynamics CRM and configured system to collect metrics such as artist retention rates and labs producing award winning films.
- Saved hundreds of hours of manual entry by programmatically importing years of data on hundreds of films and artists at a time.
- Led small team of volunteers in consolidating data from various outlets and formatting it for import.
- Reduced costs spent on outsourced development and training by configuring system and teaching employees to use it.
